

The bright green areas are the verges to be kept long to encourage biodiversity.

1. They are planted with wild daffodils and seeded with wildflowers and yellow rattle which will flower from March to September.
2. Only the edges (1m wide or mower width) are to be cut on a monthly basis.
3. No cutting to main areas between February and Early September.
4. September cut will be long and the correct machinery/strimmer needs to be used.
5. All the cuttings are to be removed please.

### KEY

Name given to each verge to be cross referenced with Modbury grass cutting schedule

**MODBURY**  
**Verges managed for biodiversity.**
